

PROPOSAL DATA ITEM DESCRIPTION (PDID)

PDID-IEPO IDENTIFICATION OF EXPECTED PARTS OBSOESCENCE

The purpose of this PDID is to obtain from the Seller a list of those parts incorporated into the Seller's final product that are likely to become obsolete.

INSTRUCTIONS:

1. The list shall describe any parts that exist within the Seller's proposed finished product that are likely to become obsolete and require replacement.
2. The Seller should also identify when the part obsolescence is likely to occur and how the Seller proposes to deal with the situation in a manner that will not compromise the on time delivery of qualified finished product.
