PROPOSAL DATA ITEM DESCRIPTION (PDID)

PDID-MDMP
DATA MANAGEMENT PLAN

The purpose of this PDID is to obtain from the Offeror a Contract Data Management Plan.

INSTRUCTIONS:

1.   The plan shall describe any data management function that exists within the Seller's organization including responsibilities, procedures, location and interrelationship with other organizational elements.

2.   The plan shall describe how the Seller's organization will ensure timely completion and submission of data items required to be submitted in accordance with the Subcontract Data Requirements List (SDRL) or the SDRL Codes on the Catalog Pages and Appendix G attached to the proposed contract.

3.   If the data management function already exists, describe how the work contemplated by this solicitation will be accommodated in consideration of existing and forecasted work. If this is to be a new function,or, if additional resources will be required, indicate requirements and describe how these resources will be obtained.
