

## PROPOSAL DATA ITEM DESCRIPTION (PDID)

### **PDID-MPMP PRODUCTION MANAGEMENT PLAN**

The purpose of this PDID is to obtain a plan from the Offeror's production management organization to support production and production test efforts for this program.

#### INSTRUCTIONS:

1. Ensure consistency between this plan, the Program Management and Control Plan (MPMC), the Quality Assurance Plan (MQAP) and the Manufacturing Milestone Schedule (MMMS), as applicable.
2. Provide a Production Management Plan in narrative form that describes the methods and concepts for utilizing facilities, tooling, and manpower resources.
3. Utilize a separate chart to time phase all actions required to produce, test, inspect, and deliver the product.
4. The Production Management Plan shall be organized as follows:
  - a) Make or Buy - Describe your program for make vs. buy decisions and any supporting rationale impacting this program.
  - b) Special Tools (ST) and Special Test Equipment (STE) - Identify special tools and special test equipment required.
  - c) Status and Reporting - Describe the status and reporting system to be used.
