

PROPOSAL DATA ITEM DESCRIPTION (PDID)

PDID-POMP
PARTS OBSOLESCENCE MANAGEMENT PLAN

The purpose of this PDID is to obtain from the Seller a Parts Obsolescence Management Plan.

INSTRUCTIONS:

1. The plan shall describe any parts obsolescence management function that exists within the Seller's organization including responsibilities, procedures, location and interrelationship with other organizational elements.
2. The plan shall describe how the Seller's organization will ensure timely identification of parts incorporated into finished product that are likely to become obsolete prior to the expiration of the finished product's intended life. In addition the plan shall also describe the process by which the Seller qualifies replacement parts.
3. If the parts obsolescence management function already exists, describe how the work contemplated by this solicitation will be accommodated in consideration of existing and forecasted work. If this is to be a new function, or, if additional resources will be required, indicate requirements and describe how these resources will be obtained.
