

PROPOSAL DATA ITEM DESCRIPTION (PDID)

PDID-TPTP PRELIMINARY TEST PLAN

The Offeror shall include in his technical proposal a preliminary plan to accomplish the testing required by the specification. The plan shall include the information required by the following instructions.

INSTRUCTIONS:

1. Provide a list of the types of tests required by the specifications and any other tests normally performed during your manufacturing process.
2. For each type of test indicate:
 - a. The equipment and facilities required.
 - b. Whether the tests will be conducted by the Offeror or a subcontractor.
 - c. The expected duration of the test including set up time.
 - d. If you intend to attempt to meet the testing requirement by requesting an extension from previous, similar tests.
3. Provide a summary of your experience in performing similar tests. Summarize the requirement, equipment and facilities used, subcontractors used and success in conducting tests properly.
4. Ensure consistency between this plan and your Quality Assurance plan (PDID - MQAP), Manufacturing Plan (PDID - MMPA), Management Proposal Narrative (PDID - MMPN) and Production Management Plan (PDID - MPMP) if any or all are required to be submitted.
