

PROPOSAL DATA ITEM DESCRIPTION (PDID)

PDID-TRLT HIGH RISK AND LONG LEAD TIME ITEM LIST

The Offeror shall include in his technical proposal a High Risk and Long Lead Time Item List that shall contain the information described in the following instructions.

INSTRUCTIONS:

1. Identify all elements in your proposal, including the product, facilities or processes that represent significant risk to meeting the performance or schedule requirements of the solicitation. For each high risk component of the product indicate:
 - a. If it is furnished by the Government.
 - b. The Offeror's part number and the manufacturer's part number.
 - c. The name of the manufacturer or possible manufacturers.
 - d. The next higher assembly on which the component is used

2. For each element identified indicate:
 - a. The origin of the risk, such as, available technology, critical materials, long manufacturing time, long testing time.
 - b. Include the same information for high risk components.
 - c. Identify the specific requirements in the solicitation, if any, that create the risk for each element.
 - d. Describe your means of managing the risks identified. Include contingency plans in your description.
